

Ciaran Fahey - Head of Tech

‘Hey everyone! I’m Ciaran and I’m hoping to be **your** new Head of Tech for 2019/2020, so it means a lot to me that you’re reading this!’

Before coming to university, I had never experienced radio and was eager to see what it was like. Joining Shock was the best decision I've made so far at university (definitely better than spending all my money in the SU on food and drink).

My whole life has practically been music, music and more music. I very early on decided I wanted to work somewhere that music was involved with and there learnt how to play as many instruments as possible.

This eventually led to me to college when I studied music performance, I did as much performing as possible and through that I learnt how to set up my own gigs and how to run a PA system during live events.

Edd has done an insane amount of work as head of Tech this year and I can only strive to be as efficient as he has been. I want to make sure that the equipment in the studios is set up as securely as it can be as I know microphones seem to break often.

I also want to make sure Zetta is duplicate free as I know that myriad was over-run with multiple versions of the same song and would not want that to happen to Zetta.

Manifesto

- I Studied Music performance at sixth and college and have helped set up multiple different gigs and events and I am very comfortable with a PA system
- I have my own show on Tuesdays at 8pm called ‘Ciaran’s Calm’ where I try to play a variety of music that might not make it on to the BBC 1 Radio show.
- I have been to as many of the shock socials as possible most recently the Sound of Salford where I helped support Edd on tech using the PA system for live bands.
- I’m going to be getting some work experience at Capital during the summer break too which will hopefully give me some connections and experience in how things are run.
- I am naturally very skilled with technology and can pick up tech skills very quickly. I will make sure to learn and become the head of tech that Shock will need (and already has!).

Thank you for Reading and I will see you next Monday at AGM!!
